Introduction

This document presents a complete documentation guide for the development of Kiki's Bakery, a website designed to improve the bakery and increase its online presence. Developed for the COMP 2680 course final project, this document provides an in-depth understanding of the project's objectives, features, and potential benefits for Kiki's Bakery.

Project Overview

The Kiki's Bakery website project introduces a digital platform for the renowned bakery, aiming to meet the evolving demands of the culinary market. By providing an engaging online platform, customers can easily explore a diverse menu and get to know the unique story and locations of Kiki's Bakery. This initiative aligns with the bakery's goal to enhance brand visibility and customer engagement across Canada, offering a delightful online experience that reflects the coziness found in its physical locations. The project promotes a user-friendly interface system and an immersive storytelling approach to connect with a broader audience.

Project Objectives and Description

Project Objectives:

1. Create an engaging website to showcase Kiki's Bakery products.
2. Enable customers to easily explore the menu.
3. Establish an online presence for Kiki's Bakery across Canada.
4. Tell the world about Kiki's Bakery's story.

Project Description:

The website serves as a virtual storefront for Kiki's Bakery, allowing users to explore the bakery's offerings and discover more about the brand's story and locations.

Business Benefits

The website design for Kiki's Bakery brings a lot of benefits to the business. By establishing an online presence, the bakery expands its reach, attracting a broader customer base. The user-friendly interface and streamlined menu enhance customer satisfaction, promoting loyalty. The visually appealing design and immersive storytelling create a memorable brand experience, strengthening the bakery's identity. The website serves as a powerful marketing tool, showing the delicious products and unique story, ultimately driving increased online and offline traffic. Overall, the design optimizes efficiency, customer engagement, and brand visibility, contributing to the success of Kiki's Bakery in the digital age.

User-Level Features

1) Clickable hover Logo

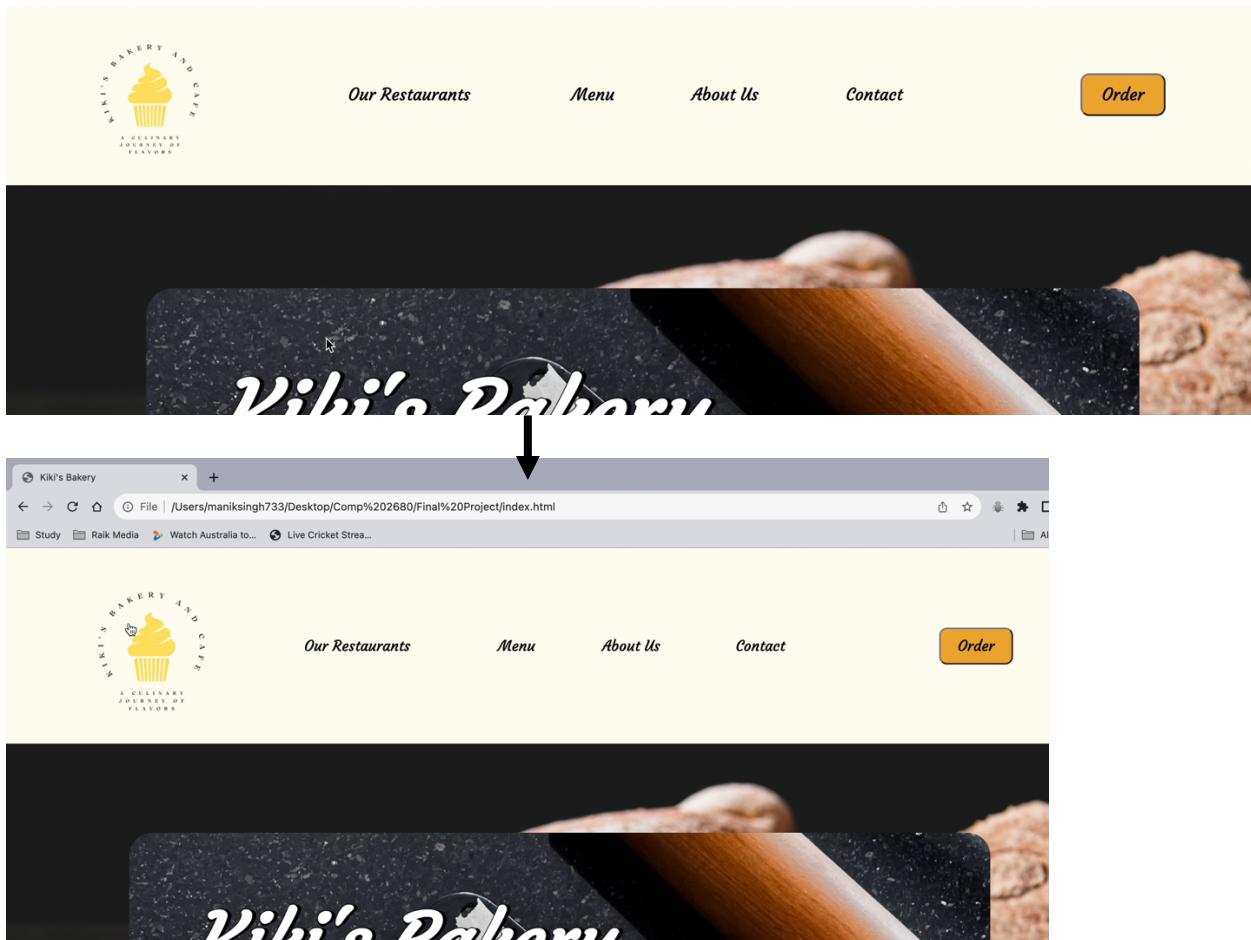

Purpose:

Displays the website logo in the navigation bar with the website's name and tag line.

Functionality:

Hovering on the logo increases the size of the logo and allows users to click the logo which takes them again to the main page.

Screenshot:

2) Clickable item images

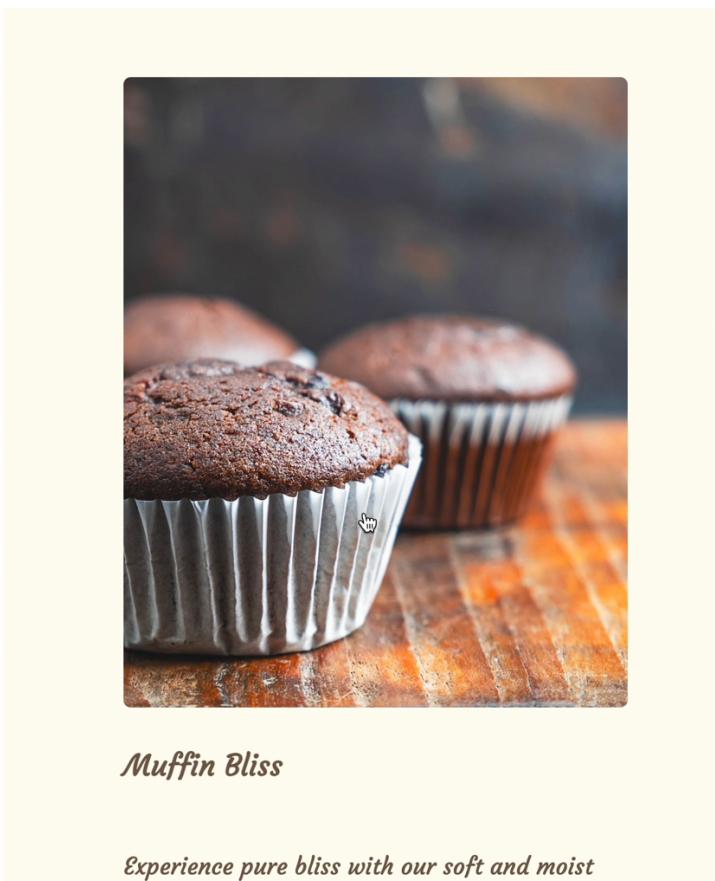

Purpose:

Allow users to explore the menu and view details of pastries, cupcakes, cookies, and muffins.

Functionality:

Hovering on the images increases the size of the logo and allows users to click the images which takes them to the menu page.

Screenshot:

3) Header

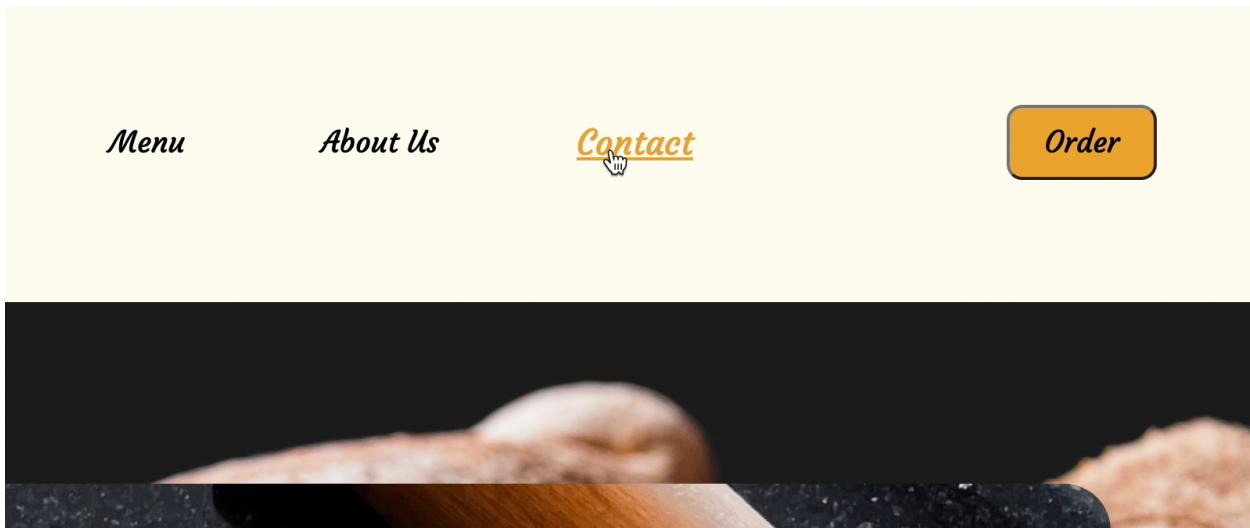

Purpose:

Displays links to other related web pages.

Functionality:

Hovering on the link increases the size of the link and allows users to click the links which takes them to the connected web page.

Screenshot:

4) Footer

Purpose:

Displays links to other related web pages and contains last updated.

Functionality:

Hovering on the link increases the size of the link and allows users to click the links which takes them to the connected web page. Also last updated tells the user when the page was last updated.

Screenshot:

5) Buttons

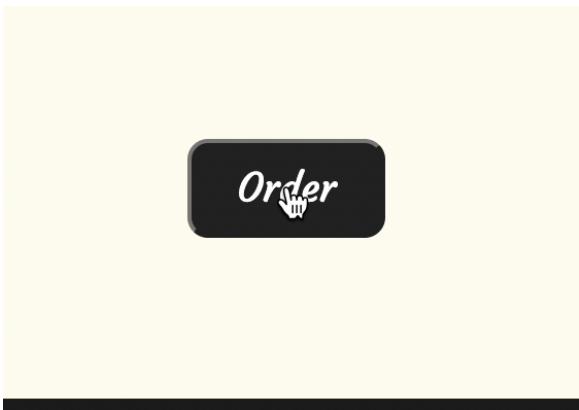

Purpose:

Takes links to other related web pages.

Functionality:

Hovering on the button changes the color of the button and allows users to click the buttons which takes them to the connected web page.

Screenshot:

6) Video

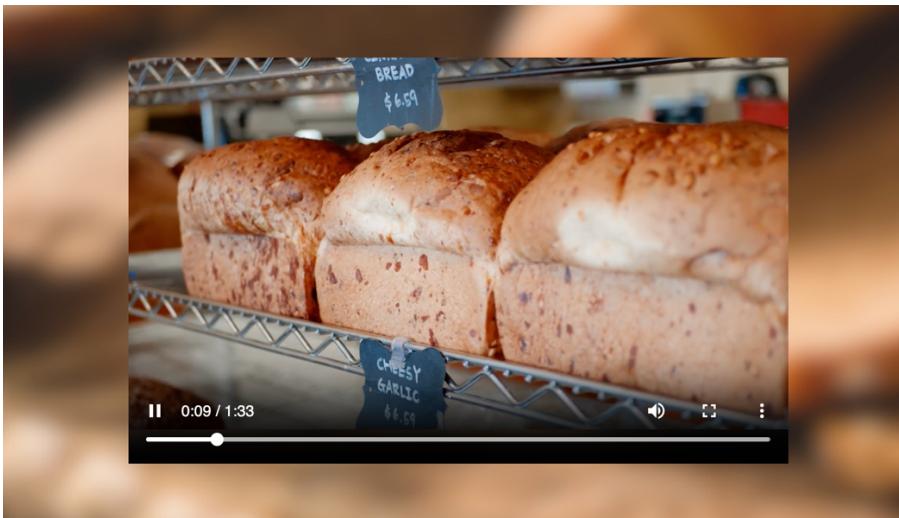

Purpose:

Video regarding the bakery.

Functionality:

You can use controls to play the video.

Screenshot:

7) Contact Form

Purpose:

Form so the user can contact the bakery.

Functionality:

The form uses JavaScript validation to ensure correct details are entered and displays a successful message when everything is right.

Limitations and Future Prospects

Limitations:

- 1) No shopping cart feature to order items.
- 2) No payment methods are present.
- 3) No real-time inventory tracking.

Future Prospects:

- 1) Implement payment gateways.
- 2) Add a shopping cart for users to order.
- 3) Integrated inventory management for real-time updates for stock of items.
- 4) Implementing user accounts would allow customers to track order history, save preferences, and participate in loyalty programs, improving the overall customer experience.
